

spectrum® OIL CONTAINERS

7 reasons to **CHANGE**

spectrum® OIL CONTAINERS

competitor

CONTAINERS

rectangle-shape makes containers extremely stable—does not tip over

vertical design easily topples over

POURING

just switch the breather vent to the on position to begin pouring & turn off when finished

user must push button while filling, causing strain on thumb

ERGONOMICS

design has forearm rest plus 3 handles on top, back, & front

only one handle available on containers

HAND PUMP

place foot on container to hold it down when using hand pump

awkward design lifts up when using hand pump

VOLUME

larger volumes—8, 11, 15 liters

small volumes—10 liters & under

STORAGE

quarter-turn lids provide efficient storage

cylinder shape and nozzles require more space when storing

COLOR OPTIONS

up to 100 color combinations when using lid & breather vent secondary color

limited to 10 colors
