TRICÓ VIEWPORT

Read Instructions Before Installing

To Install:

- 1. Make sure all contaminants or noticeable particles are removed from the viewport.
- 2. Apply pipe thread sealant to the pipe thread.
- Use an appropriate wrench to sufficiently tighten the viewport into the fluid level indicating port.

Pipe Thread Sealants:

It is recommended to use a thread sealant, such as teflon tape, when installing the viewport. Do not use chlorinated sealants on plastic viewports.

Failure to meet the following may cause unit failure.

- DO NOT use chlorinated solvents or sealants, such as acetone, when cleaning the viewport.
- DO NOT use plastic sight as a lever when installing or removing viewport from equipment.
- DO NOT remove sight during equipment operation.

For information or technical assistance on the viewports or any other Trico products please call our toll free number at 800-558-7008 (U.S. only) or call 262-691-9336 and ask for Customer Service.
