

INDUSTRIAL ABSORBENTS

keeping the work environment safe & clean

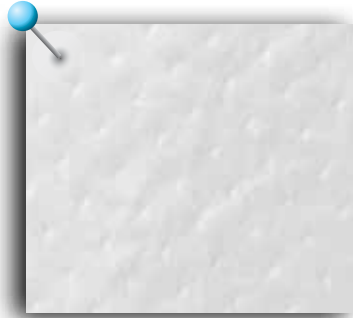

» WHAT TYPE OF ABSORBENT DO I CHOOSE? «

Universal

They keep the work environment safe by picking up a variety of spills including oil, coolants, solvents, and water. They are an economical choice when cleaning up multiple types of spills.

Oil Only

They repel water and only absorb oil and other hydrocarbon products. The white color makes it easy to see when they're saturated.

Camo

They absorb and retain oils, coolants, solvents, and water. The camouflage pattern hides grime, allowing material to be in place longer. Durable top layer makes it great for foot traffic.

PERFORATED ROLLS

Do you need to clean up a large area? When a spill covers a large area, smaller pads won't always do the trick or clean it up as quickly. Instead, attack the spill at once with perforated absorbent rolls.

Perforated rolls are ideal for leaks, drips and overspray while allowing for more surface area coverage than pads. Perforated every 30" for quick and easy tearing, absorbent rolls allow you to get as much material as you need. These lint-free rolls will not contaminate your equipment and they are tough enough for foot traffic.

Part Number	Absorbency	Size	Package Size	Absorption Capacity/Package	Package Weight
30178	Universal	30" x 150'	1 roll	38 gal.	27 lbs.
30181	Oil Only	30" x 150'	1 roll	50 gal.	33 lbs.
30183	Camo	30" x 150'	1 roll	52 gal.	35 lbs.

ORGANIC CORN COB SOCK

Do you have a machine with a lot of overspray or need to contain a large spill? When a spill starts to spread, it will quickly become a work hazard. Keep your employees and environment safe by containing it with a sock.

The flexibility of absorbent socks allows them to easily surround a leaking machine. Absorbent socks are filled with organic corncob to provide superior absorbency and full wicking saturation of each sock.

Part Number	Absorbency	Size	Package Size	Absorption Capacity/Package	Package Weight
30185	Universal	3" x 48"	40	25 gal.	60 lbs.

ABSORBENT PADS

Are you tired of using messy clay to clean up small oil spills? Absorbent pads are ideal to control everyday leaks and spills. They have an easy-tear perforation down the middle, allowing you to take only what you need, saving you money. The dimple pattern speeds wicking of liquid throughout the pad and provides durable construction to prevent tearing during use.

Part Number	Absorbency	Size	Package Size	Absorption Capacity/Package	Package Weight
30177	Universal	16" x 20"	100 pads	23 gal.	16 lbs.
30180	Oil Only	16" x 20"	100 pads	30 gal.	20 lbs.
30184	Camo	15" x 19"	200 pads	32 gal.	19 lbs.

DRUM TOP PADS

Do you have messy drum tops? Eliminate drips and overflow when pumping fluids from drums with these drum topper pads. They keep drum tops clean and grime free. Containing two pre-cut bung holes, the pad provides easy drum access and placement of pad.

Part Number	Absorbency	Size	Package Size	Absorption Capacity/Package	Package Weight
30179	Universal	22" dia.	25 pads	7 gal.	6 lbs.
30182	Oil Only	22" dia.	25 pads	7 gal.	6 lbs.
