

Gearbox Installation Kit

Protect Your Equipment

Trico's Gearbox Installation Kit provides protection aimed at extending the life of your asset and lubricant. The 4 in 1 design features include: Oil Sampling Pitot Tube and Sampling Port, Liquid Level Gauge, a Watchdog EX Desiccant Breather, and Quick Connections on the top and bottom of the kit allowing for in service kidney loop filtration, topping off, and performing a drain, flush and refill.

The Watchdog Desiccant Breather will pull moisture from within the system as well as control contamination ingress from entering the system. This function protects the lubricant, which helps extend the life of the gearbox.

Protect the integrity of your in-service lubricants with the Gearbox Installation Kit.

Not sure what solution you need? Give us a call, we can help assist you with the right solution for your application.

Benefits:

- Extended equipment life
- Increased lubricant life
- Extended oil change intervals
- Decreased equipment maintenance
- Increased savings in maintenance costs

Features:

- Identify oil levels quickly with sight gauge
- Pitot tube provides quick sampling of fluid
- Variety of sizes and fittings to meet specific needs
- Fill, change and kidney loop oil through disconnects without fear of contamination
