

OIL INTELLIGENCE

More Than An Oil Analysis Program

Why Oil Intelligence?

It all starts with a world class laboratory

- Our lab is ISO 17025 and 9001 certified, so you know that quality is assured, and you can have confidence in the results you see
- With several of our subject matter experts serving ASTM leadership you can be assured our lab is cutting edge and driving changes in the field of lubricant analysis

Our analysts have experience like no other

- Half a dozen analysts with over 100 years of combined experience
- Our analysts come from diverse backgrounds: industry, tribology, and chemistry

Services Provided

- Used Oil Analysis
- Wear Particle Analysis
- Coolant Analysis
- Diesel Fuel Testing
- Transformer Oil Analysis
- Metalworking Coolant Analysis
- Program Evaluation
- Personal Analyst Dialog
- Results Interpretation
- Individualized Solutions

What Makes Oil Intelligence Different?

Trico steps up your experience by offering customized insight, scheduling individualized conferences, and offering product solutions to help make your maintenance program the best it can be. **Combining all of these - that's intelligence.**

Real-Time Data

- Upon completion of analysis you will receive your results via email, with major concerns highlighted
- Online lab portal access allows you to customize how you view your results
- View big-picture trends on all equipment at a glance using our Enterprise Dashboard
- Consult with any analyst quickly about necessary action items

Solutions Provider

- Our solutions experts will walk you through the results of the oil analysis and offer suggestions for how to resolve any issues found during testing
- Our engineers will design solutions that are specific to your needs
- Live trials help build a business case for support as you improve your predictive maintenance program
